

Obstetrics, Gynaecology and Reproductive Medicine

Obstetrics, Gynaecology and Reproductive Medicine is a great revision guide for the MRCOG and beyond.

Obstetrics, Gynaecology and Reproductive Medicine is an authoritative and comprehensive resource that provides all obstetricians, gynaecologists and specialists in reproductive medicine with ready access to up-to-date information on all aspects of obstetrics and gynaecology. Over a three-year cycle of 36 issues, the emphasis of the journal is on the clear and concise presentation of information of direct clinical relevance to specialists in the field and candidates studying for MRCOG Part II. Each volume contains review articles on obstetric and gynaecological topics. The journal is invaluable for specialists in obstetrics and gynaecology, both in their role as trainers of MRCOG candidates and in keeping up to date across the broad span of the subject area. Over any three-year period, a subscription will ensure access to up-to-date, understandable information on the full range of obstetrics, gynaecology and reproductive medicine topics.
